# An Introduction to the ArchiMate ® Notation
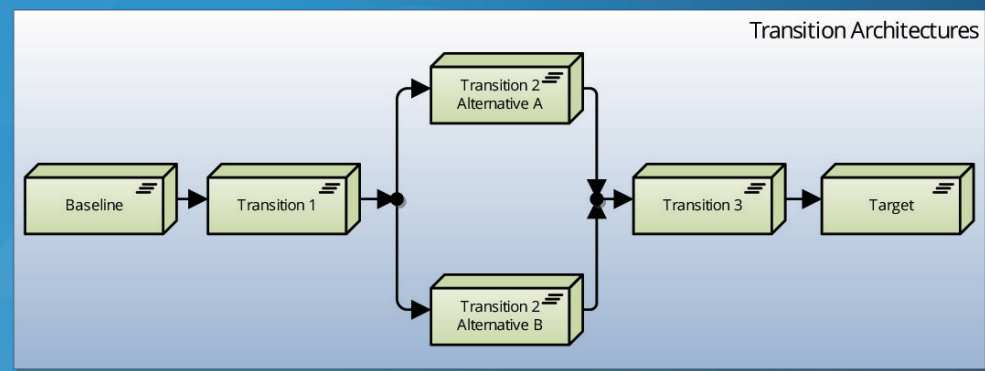

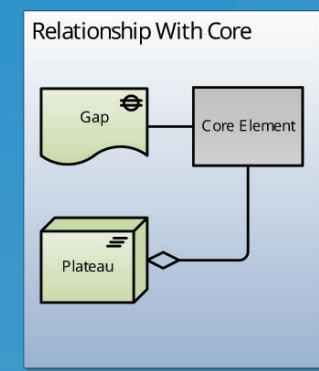

Extensions
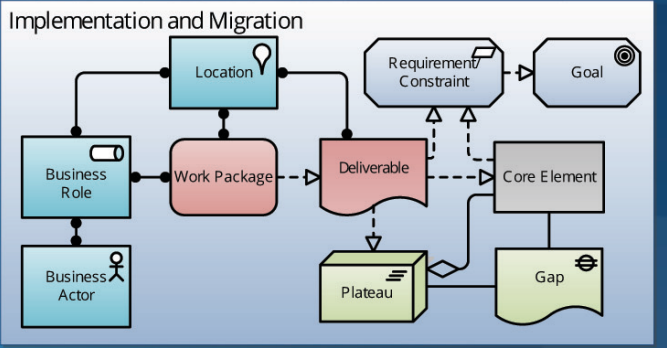

Motivation Extension Object Types

Stakeholder
An individual, team, or organization with an interest in the outcome of the architecture

Driver
Something that creates, motivates, and fuels the change in an organization.

Assessment
The outcome of the analysis of some concern, revealing the strengths, weaknesses, opportunities, or threats that may trigger a change to the enterprise architecture

Requirement
A desired property that must be realized by a system

Constraint
A restriction on the way in which a system is realized.

Principle
A general desired property that guides the design and evolution of systems in a given context
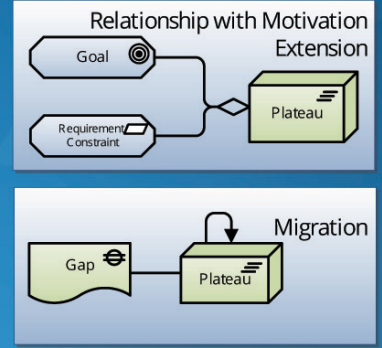

Goal
An end that a stakeholder wants to achieve

- - - - - - ▶ Influence

There are two extensions for ArchiMate –
The Motivations Extension and Delivery (Implementation & Migration) Extension.

Implementation and Migration Extension Object Types

Work Package
A work package is defined as a series of actions designed to accomplish a unique goal within a specified time.

Gap
A gap is an important outcome of a gap analysis in Phases B, C and D of the TOGAF ADM

Deliverable
A deliverable is defined as a precisely-defined outcome of a work package.

Plateau
A time interval with a start and an end, corresponding to a specific change in the enterprise architecture
