

# AWS Certified Data Analytics – Specialty

AWS Certified Data Analytics – Specialty certification is intended for individuals with experience and expertise working with AWS services to design, build, secure, and maintain analytics solutions. It is recommended to have a five years of experience with common data analytics technologies!

This credential also helps organizations identify and develop talent with critical skills for implementing cloud initiatives. Earning AWS Certified Data Analytics – Specialty validates expertise in using AWS data lakes and analytics services to get insights from data. This exam does not require deep hands-on coding experience, although familiarity with basic programming concepts would be an advantage.

---

## Who should attend?
