

AWS Certified Security – Specialty

The AWS Certified Security - Specialty exam validates technical skills and experience in securing and hardening workloads and architectures on the AWS platform. Attendees with two or more years of hands-on experience designing and deploying cloud architecture on AWS should join this half-day course to learn how to prepare for the exam. We'll help you prepare by exploring the exam's topic areas and mapping them to specific areas to study. We'll review sample exam questions in each topic area, teaching you how to interpret the concepts being tested so that you can better eliminate incorrect responses.
