CompTIA N+®

The CompTIA® Network+® (Exam N10-007) course builds on your existing user-level knowledge and experience with personal computer operating systems and networks to present the fundamental skills and concepts that you will need to use on the job in any type of networking career. If you are pursuing a CompTIA technical certification path, the CompTIA® A+® certification is an excellent first step to take before preparing for the CompTIA Network+ certification.

4P Advisory Services

Who should attend?

This course is intended for entry-level computer support professionals with a basic knowledge of computer hardware, software, and operating systems who wish to increase their knowledge and understanding of networking concepts and acquire the required skills to prepare for a career in network support or administration, or who wish to prepare for the CompTIA Network+ certification (Exam N10-007).

Benefits

If your job duties include network troubleshooting, installation, or maintenance, or if you are preparing for any type of network-related career, it provides the background knowledge and skills you will require to be successful.

Learn basic network theory concepts and major network communications methods, Describe bounded network media, Identify unbounded network media & Identify the infrastructure of a WAN implementation.

Learn the major types of network implementations, Identify TCP/IP addressing and data delivery methods, Implement routing technologies & Identify the major services deployed on TCP/IP networks.

Learn the components used in cloud computing and virtualization, Describe basic concepts related to network security, Prevent security breaches & Respond to security incidents
