

ISO 27001:2013 Internal Auditor Program

The Information Security Management Systems, or ISMS, standard specifies the requirements for establishing, implementing, maintaining and continually improving an information security management system within the context of the organization.

This Internal Auditor course is based on the principles of ISO 19011:2011. It is designed for those people who wish to understand and conduct internal audit assessments to the ISO/IEC 27001:2013 certification standard and its relation to the ISO 27000 series of standards for information security management.

Who should attend?

This course is suitable for any managers or executives responsible for the security and confidentiality of their business-critical information. This course is designed for those people who wish to understand and conduct internal audit assessments to the ISO 27001:2013 certification standard and its relation to the emerging ISO 27000 series of standards for information security management
