Duration: 15 hours, 30 minutes, self-paced

Language: English

Course Overview

This course is based on the COBIT 5 Foundation Exam syllabus with a focus on learning and retaining information. COBIT 5 terms are explained in detail and are supported with examples. You will study:

- The COBIT 5 Principles
- The COBIT 5 Enablers
- An Introduction to COBIT 5 Implementation
- The Process Capability Assessment Model

The business orientation of COBIT consists of linking business goals to IT goals, providing metrics and maturity models to measure their achievement, and identifying the associated responsibilities of business and IT process owners.

Upon gaining COBIT 5 Foundation certification you will be able to demonstrate a good level of understanding about the IT management issues that organizations face today and how COBIT 5 can be used to meet these issues. It is likely that you will have used the elements of COBIT5, in practice, and will be able to recommended applications of COBIT5 for enterprise-wide projects.

Accreditation

The COBIT best practice is maintained by ISACA. COBIT training is accredited by the official examination institute, APMG.
